Score for this attempt: 12 out of 13

Submitted Dec 7 at 9:33pm

This attempt took 3 minutes.

Question 1

1 / 1 pts

Write the CSS declaration that applies the grid layout to the selector.

Note that the standard way to write a declaration in this class is to use one space after the colon and be sure to include the semi-colon in your declaration.

display: grid;

Question 2

1 / 1 pts

✓ Quiz submitted

Write the CSS declaration that applies the flex box layout to the selector.

Note that the standard way to write a declaration in this class is to use one space after the colon and be sure to include the semi-colon in your declaration.

display: flex;

Question 3

1 / 1 pts

A CSS comment is used to add explanatory notes to the code or to prevent the browser from interpreting specific parts of the style sheet. CSS comments have no effect on the layout and style of the document.

- MDN

True or False? CSS comments can be used to traverse multiple lines as shown here:

```
/* The comment below is used to
   disable specific styling */
/*
span {
  color: blue;
  font-size: 1.5em;
}
*/
```

☒ True

☐ False

Incorrect

Question 4

0 / 1 pts

HTML comments are not displayed in the generated browser document, but they can help provide explanatory, development references in your HTML markup.

Make the text **Call to Action** in the following HTML example snippet a valid HTML comment.

```
*** Call to Action ***
<aside class="cta">Join Now!</aside>
```

<!-- Call to Action -->

Question 5

1 / 1 pts

✓ Quiz submitted

Consider the following HTML markup snippet.

```
<div class="parent">
  <p>Immediate child 1</p>
  <p>Immediate child 2</p>
  <div>
    <p>Nested child</p>
  </div>
</div>
```

Which of the following CSS selectors would correctly select the first two p elements but not the nested paragraph?

- ☒ .parent > p
- ☐ .parent ~ p
- ☐ .parent p
- ☐ .parent + p

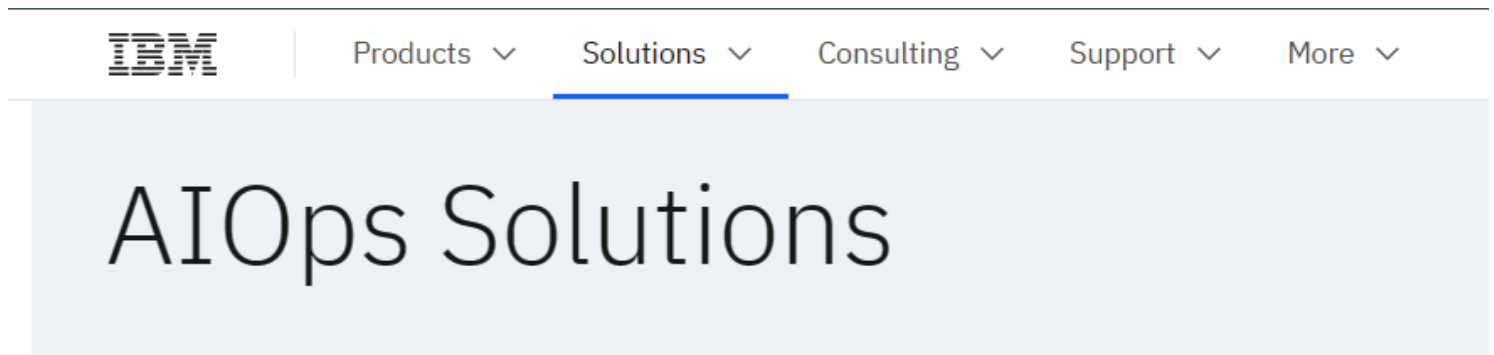

Question 6

1 / 1 pts

What is the name of the UX accessibility and design principle of providing visual or other media clues to make it easy for users to navigate a site or application and locate the information they need? **Hint:** Review the activity instructions in the responsive menu learning activity.

Here is an example showing the **Solutions** menu item as underlined and blue:

Wayfinding

Question 7

1 / 1 pts

What does the  syntax in the CSS rule selector do? For example:

```
.active::before
  content: "⚙️"
  margin-top: .5em;
}
```

✓ Quiz submitted

- ☐ References a data source of the element that is selected.
- ☒ Selects a pseudo-element of the selected element.
- ☐ Selects the next sibling element as a CSS combinator.
- ☐ Separates two properties in order for JavaScript to reference one or the other.

Question 8

1 / 1 pts

Which of the following **document titles** is the most meaningful and relevant for the landing page of a chamber of commerce site from San Miguel, El Salvador?

- ☐ Chamber Home - Landing Page
- ☐ Home Page
- ☒ San Miguel Chamber of Commerce
- ☐ WDD 231 - Chamber Home Page
- ☐ Antonia Francesca - WDD 231 - San Miguel Chamber of Commerce Website

Question 9

1 / 1 pts

Which of the following is **not** checked by the DevTools Lighthouse **accessibility** tool?

- ☒ Page download time and first paint.
- ☐ Background and foreground colors do not have a sufficient contrast ratio.
- ☐ Touch targets have sufficient size and spacing.
- ☐ Heading elements appear in a sequentially-descending order.
- ☐ Document has a <title> element

Question 10

1 / 1 pts

Which of the following is the attribute needed in order for a script reference to function as a module?

- ☒ type="module"
- ☐ defer
- ☐ script="mod"
- ☐ @import "module"

Question 11

1 / 1 pts

Consider the following

✓ Quiz submitted

```
// moduleA.js file
const message = "Hello, world!";
function greet() {
  console.log(message);
}
export { greet };
```

```
// index.js file
import { greet } from './moduleA.js';

greet();
```

Upon execution, an error is encountered, and the `greet()` function fails to be imported. Which of the following statements best describes the potential issue in this scenario?

- ☐ The file extension in the import statement should be '.mjs' instead of '.js'.
- ☐ The import statement should be using single quotes (') instead of double quotes (").
- ☒ The type="module" attribute should be added to the script tag in the HTML file importing the JavaScript modules.
- ☐ The 'export' keyword should be replaced with 'export default' in the file 'moduleA.js'.

Question 12

1 / 1 pts

Which of the following is a common format used to exchange data between a client and API service?

- ☐ CSV
- ☐ HTML
- ☐ TXT
- ☒ JSON

Question 13

1 / 1 pts

If you wanted to change the reported temperatures coming from the OpenWeatherMaps API from the default value to Fahrenheit values, which of following would you add to your API call?

- ☒ &units= imperial
- ☐ &temp = imperial
- ☐ &temp = fahrenheit
- ☐ &temperature-units = fahrenheit
